To Whom It May Concern

Dear Sir/Madam,

I am writing to provide my strong recommendation for Mr. Nikita Simakov, with whom I have had the privilege of working since the very beginning of Gentlyx project developed by our company. From day one, Mr. Simakov played a central role in shaping our product and growth strategy.

Over the course of our collaboration, we went through hundreds of hypotheses across product design, user acquisition, retention and monetization. Mr. Simakov led this process with rigor and creativity, gradually transforming raw ideas into a coherent product roadmap.

As a result, we identified the right business model, established a scalable user acquisition engine, and achieved first traction. This transformation would not have been possible without Mr. Nikita Simakov's leadership, analytical mindset, and relentless drive.

I am confident in his ability to deliver results in any high-growth, AI-driven environment, and I strongly recommend him for any future opportunities.

Sincerely,

Artem Cheremukhin
Director, MAX ATTN CAPITAL LTD
